

BATHROOM

GOING FOR THE GOLD

P&H Interiors

The sole focus in this master bath was to create a room that exuded tranquility as well as luxury. Sheer draperies and soft lighting provide an ethereal ambience ideal for enjoying a soak in the freestanding tub. The oversized his-and-hers shower is adorned with Oceanside glass mosaics in a custom pattern, which complements the wenge-stained cabinetry and crisp marble of the Corsica Cream floors and Isis White counters. pnhinterior.com

SKY BLUE BEAUTY

Brown's Interior Design

This master bathroom was completely gutted to showcase the space in a newer, more elegant way. The homeowners loved the idea of using the glass and ceramic mosaic tiles on the floor, in the shower and on the counter tops. The combination of the colors and placement of the tile creates a significant impact when you enter the room. The custom cabinetry, in a glossy Tiffany blue finish, complements the color scheme. brownsinteriors.com

KITCHEN/BREAKFAST ROOM

MODERN GATHERING

P&H Interiors

The homeowners wanted a tailored, contemporary design optimized for entertaining. A pair of multipurpose floating islands maximize function and circulation. The center island includes a large prep surface, under-counter wine chiller, and a free-form bar sink. A contrasting palette between the dark cabinetry and organic stone and glass finishes, highlighted with hints of color, creates a sleek yet inviting look. pnhinterior.com

OPEN SPACES

Katherine
Shenaman Interiors

This renovated kitchen opens to the adjoining family room and makes a picture-perfect presentation with all-white cabinets, polished nickel fixtures and Calcutta Gold marble throughout. The bar-style center island invites everyone to congregate comfortably during social gatherings. Dark wood floors and rattan-topped bar stools impart an island feel, while the "Sputnik" light fixture adds a modern touch. katherineshenaman.com
